Important Note
Please Read Carefully**Study Tips**

This product will provide you questions and answers along with carefully compiled and written by our experts. Try to understand the concepts behind the questions instead of cramming the questions.

Go through the entire document at least twice so that you make sure that you are not missing anything.

Latest Version

We are constantly reviewing our products. New material is added and old material is revised. Free updates are available for 90 days after the purchase. You should check your member zone at CramBible an update 3-4 days before the scheduled exam date.

Here is the procedure to get the latest version:

1. Go to www.CramBible.com
2. Click on Member zone/Log in
3. The latest versions of all purchased products are download from here. Just click the links.

For most updates, it is enough just to print the new questions at the end of the new version, not the whole document.

Feedback

Feedback on specific questions should be send to web@CramBible.com. You should state: Exam number and version, question number, and login ID.

Our experts will answer your mail promptly.

THE TOTAL NUMBER OF QUESTIONS IS 182**QUESTION NO:1**

1 You are an IT professional who are specialized in Microsoft Office Communications Server 2007. Now you are employed in an international company which is named Wiikigo. You are in charge of providing technical support to your company. You are planning to deploy a Microsoft Office Communications Server (OCS) 2007 network. Installation of 500 Microsoft Office Communicator phones in Huston is included in the deployment plan. According to the company requirement, you have to make sure that the OCS 2007 deployment meets the following requirements: Users must be able to use the Session Initiation Protocol (SIP) addresses and a five-digit dialing feature to make Office Communicator calls to each other. Users must be able to make Public switched telephone network (PSTN) calls to the Office Communicator phones. So what should you do? (Choose more than one)

- A. A normalization rule in the Huston location profile should be configured to translate the five-digit dialing into a full E.164 number for the Office Communicator users.
- B. A Mediation Server in Huston should be installed and configured.
- C. All the Office Communicator users should be configured with a SIP URI and a full E.164 number.
- D. A Phone Usage record should be configured for Huston, and it should be assigned to the Office Communicator users.
- E. A Route should be configured to the Huston Mediation Server, and the Target Regular Expression should be configured to support the five-digit dialing feature.

Answer: ABC

QUESTION NO:2

2 You are an IT professional who are specialized in Microsoft Office Communications Server 2007. Now you are employed in an international company which is named Wiikigo. You are in charge of providing technical support to your company. You have Microsoft Office Communication Server (OCS) 2007 and Microsoft Office Communicator 2007 client installed on your company network. You set up a Windows SharePoint Services 3.0 server and configure the Windows Server 2003 Certificate Authority for autoenrollment. Besides, you have Office Communicator Phone Edition phones installed and block UDP ports between 100 and 200 on your firewall that are outbound to the Internet. You find that the Office Communicator Phone Edition phones do not register to OCS 2007 server. These phones do not have correct IP addresses and do not display the correct date and time. You have to make sure that the following business requirements are met: The network must have full Exchange Server 2007 functionality. The phones must be connected to a separate virtual LAN (VLAN) along with all required servers that serve the physical phones. So what should you do to make sure of this? (Choose more than one)

- A. DNS for a SIP domain and an SMTP domain should be configured. DHCP scopes and scope options should be configured for the Office Communicator Phone Edition phones and the SharePoint Server. DNS SRV records should be configured for the SharePoint Server.
- B. An internal NTP time source should be configured. A DNS SRV record should be configured to point to the internal NTP time source.
- C. DNS for a SIP domain only should be configured. DHCP scopes and scope options should be configured for the Office Communicator Phone Edition phones.

-
- D. DNS for an SMTP domain only should be configured. DHCP scopes and scope options should be configured for the Office Communicator Phone Edition phones.
- E. DNS for a SIP domain and an SMTP domain should be configured. DHCP scopes and scope options should be configured for the Office Communicator Phone Edition phones.

Answer: BE

QUESTION NO:3

3 You are an IT professional who are specialized in Microsoft Office Communications Server 2007. Now you are employed in an international company which is named Wiikigo. You are in charge of providing technical support to your company. You have a Microsoft Office Communications Server (OCS) 2007 Standard Edition server deployed to your company network. The employees of the company use Microsoft Office Communicator (MOC) 2007 and MOC 2007 Phone Edition (Tanjay) devices to make and receive telephone calls. The OCS 2007 Mediation Server uses a supported media (SIP/PSTN) gateway to connect to the Public Switched Telephone Network (PSTN). The employees use the Session Initiation Protocol (SIP) address of the firstname.lastname@wiikigo.com format to sign in to the network. You receive report from users of the MOC 2007 Phone Edition devices saying that they cannot call the voice mail system to listen to their voice mail messages. You have to make sure that the MOC 2007 Phone Edition devices connect to Microsoft Exchange Serhat shouldver 2007 Unified Messaging (UM) so that the users can listen to their voice mail messages. What action should you perform?

- A. The Exchange UM dial plan assigned to the OCS 2007 users should be modified to change the value of the Audio Codec setting to WMA.
- B. The name of the OCS 2007 Location Profile should be modified so that the name matches the Exchange UM dial plan phone context.
- C. The Exchange UM dial plan assigned to the OCS 2007 users should be modified to change the value of the VoIP security setting to SIP Secured.
- D. The Exchange UM dial plan that is assigned to the OCS 2007 users should be modified to change the value of the VoIP security setting to Secured.

Answer: D

QUESTION NO:4

4 You are an IT professional who are specialized in Microsoft Office Communications Server 2007. Now you are employed in an international company which is named Wiikigo. You are in charge of providing technical support to your company. You have Microsoft Office Communications Server (OCS) 2007 deployed to your company network. The OCS 2007 deployment topology consists of multiple OCS pools, Mediation Servers, and Edge Servers. You are deploying two Quality of Experience (QoE) Monitoring Servers. You have to configure the associations of the QoE Monitoring Servers. Which deployment topology should you choose to use?

- A. One QoE Monitoring Server should be associated with all OCS 2007 pools. Dedicate the other QoE Monitoring Server as a standby server.
- B. One QoE Monitoring Server should be associated with some of the OCS 2007 pools and all Mediation Servers. The other QoE Monitoring Server should be associated with the remaining

OCS2007 pools.

- C. One QoE Monitoring Server should be associated with all OCS 2007 pools and Mediation Servers. The other QoE Monitoring Server should be associated with Edge Servers.
- D. One QoE Monitoring Server should be associated with all OCS 2007 pools and Mediation Servers. The other QoE Monitoring Server should be associated with Edge Servers.

Answer: B

QUESTION NO:5

5 You are an IT professional who are specialized in Microsoft Office Communications Server 2007. Now you are employed in an international company which is named Wiikigo. You are in charge of providing technical support to your company. Microsoft Office Communications Server (OCS) 2007 is deployed in your company. The company CEO wants only identified users of the company to view his presence information. Since you are the technical support, you are required to set Microsoft Office Communicator (MOC) 2007 for the CEO so as to makes sure only identified users can view his presence state. Which action should be performed to achieve the goal?

- A. First, you should request the CEO to log on to OC 2007. Click Show menu, point to View, and then click Access Levels Management. Right-click People in my company, point to Change Level of Access, and then click Blocked. Then, right-click People in domains connected to my company and People in public domains. Then, move the contacts to the required access level so that they can see the presence information of the CEO. Ensure to add new contacts to the Contact List of the CEO if he wants them to view his presence information.
- B. First, you should open the registry editor on the workstation of the CEO. Second, you should browse to HKEY_LOCAL_MACHINE\SOFTWARE\Policies\Microsoft\Communicator subkey. Third, you should create the EnableAppearOffline registry DWORD. Fourth, you should set the value of the DWORD to 1 and type to REG_DWORD. Fifth, you should exit from MOC 2007 (from system tray) and launch it again. Sixth, you should sign in to MOC 2007 again and change the status to Appear Offline.
- C. First, you should open OCS 2007. Second, you should right-click the forest node, click Properties, and then click Global Properties In the console tree. Third??on the User tab, you should clear the Enable users to view presence information for non-contacts check box. Forth, you should request the CEO to add only the required people to his Contact List and assign them the required level of access.
- D. First, you should open OCS 2007. In the console tree, right-click the forest node, click Properties, and then click Global Properties. On the User tab, select the Enable users to view presence information for non-contacts check box. Request the CEO to add only the required people to his Contact List and assign them the required level of access.

Answer: A

QUESTION NO:6

6 You are an IT professional who are specialized in Microsoft Office Communications Server 2007. Now you are employed in an international company which is named Wiikigo. You are in charge of providing technical support to your company. At present, you are troubleshooting problems with an OCS 2007 Voice over Internet Protocol (VoIP) implementation. Since you are the technical support, you are required to utilize the Enterprise Voice Route Helper tool to identify the areas that can be

analyzed and fixed. Which three areas can be analyzed and fixed by the tool? (Choose more than one.)

- A. Enterprise Voice phone usages and policies can be analyzed and fixed by the tool.
- B. Front End Server routing configuration can be analyzed and fixed by the tool.
- C. Normalization rules can be analyzed and fixed by the tool.
- D. Enterprise Voice routes can be analyzed and fixed by the tool.
- E. Microsoft Office Communicator 2007 Phone Edition image update configuration can be analyzed and fixed by the tool.
- F. Mediation Server configuration can be analyzed and fixed by the tool.

Answer: ACD

QUESTION NO:7

7 You are an IT professional who are specialized in Microsoft Office Communications Server 2007. Now you are employed in an international company which is named Wiikigo. You are in charge of providing technical support to your company. A Microsoft Office Communications Server (OCS) 2007 Standard Edition server is deployed to your company network. Microsoft Office Communicator 2007 and Microsoft Office Live Meeting 2007 are utilized by all employees in the company. It is reported by Live Meeting users that slide animations in Microsoft Office PowerPoint 2007 presentations are not displayed when the presentation files are uploaded. Since you are the technical support, you are required to make sure that the slide animations display correctly. Which action should be performed to achieve the goal?

- A. The Meeting policy should be modified for the Live Meeting users and disable the Use native format for PowerPoint files option.
- B. The users should be requested to save the presentation files in the Office PowerPoint 2007 format.
- C. The users should be requested to save the presentation files in the Microsoft Office PowerPoint 972003 format.
- D. The Meeting policy should be changed for the Live Meeting users and the Use native format should be enabled for PowerPoint files option.

Answer: D

QUESTION NO:8

8 You are an IT professional who are specialized in Microsoft Office Communications Server 2007. Now you are employed in an international company which is named Wiikigo. You are in charge of providing technical support to your company. There are 700 users on the company's IP-PBX infrastructure. The company decides to deploy Microsoft Office Communications Server (OCS) 2007 to offer users Enterprise Voice capabilities. And the company wants to phase out the IP-PBX shortly. A gateway for OCS 2007 has been installed and configured to communicate with the existing IP-PBX. Initially, some users will utilize only Microsoft Office Communicator (OC) 2007 as their voice endpoint and some users will utilize an IP-Phone connected to the current IP-PBX and OC 2007 as their voice endpoints. Since you are the technical support, you are required to have all users moved from IP-PBX to OCS 2007 while phasing out the existing IP-PBX. In the outlined scenario, what is the end-user state?
