Important Note
Please Read Carefully**Study Tips**

This product will provide you questions and answers along with detailed explanations carefully compiled and written by our experts. Try to understand the concepts behind the questions instead of cramming the questions.

Go through the entire document at least twice so that you make sure that you are not missing anything.

Latest Version

We are constantly reviewing our products. New material is added and old material is revised. Free updates are available for 90 days after the purchase. You should check your member zone at CramBible an update 3-4 days before the scheduled exam date.

Here is the procedure to get the latest version:

1. Go to www.CramBible.com
2. Click on Member zone/Log in
3. The latest versions of all purchased products are download from here. Just click the links.

For most updates, it is enough just to print the new questions at the end of the new version, not the whole document.

Feedback

Feedback on specific questions should be send to web@CramBible.com. You should state: Exam number and version, question number, and login ID.

Our experts will answer your mail promptly.

THE TOTAL NUMBER OF QUESTIONS IS 112

QUESTION NO: 1 What does this entry in gated.conf mean?

```
# rip yes ;{nobroadcast ;};  
#
```

- A. gated listens for rip updates and sends them out
- B. gated behaves like routed -q
- C. gated runs once, listens for routes and terminates
- D. gated fails because the shell is not defined

Answer: B

QUESTION NO: 2 Which protocol does gated use to advertise routes?

- A. ARP
- B. RIP
- C. TFTP
- D. ICMP

Answer: B

QUESTION NO: 3 Which type of host should not use routed?

- A. server
- B. workstation
- C. external gateway
- D. departmental router

Answer: C

QUESTION NO: 4 Which problem causes TELNET or FTP addresses outside the local LAN to time out?

- A. the default route is incorrect
- B. the default route is undefined
- C. telnetd and ftpd on the local system are not running
- D. routed is looping

Answer: A

QUESTION NO: 5 Which program is needed when working with OSPF routing protocol?

- A. named
- B. BIND
- C. routed
- D. gated

Answer: D

QUESTION NO: 6 What action is needed to cause a Tru64 UNIX system to forward traffic between networks when it has multiple interfaces on different subnets?

- A. No action required, because Tru64 UNIX always functions as a router.
- B. Set SysMan to run the system as an IP router.
- C. Add the appropriate routes to the /etc/routes file.
- D. Configure the routes to point to this Tru64 UNIX system.

Answer: B

QUESTION NO: 7 Which routing protocol interoperates with routed?

- A. HELLO
- B. RIP
- C. EGP
- D. BGP

Answer: B

QUESTION NO: 8 The command route delete default 1.2.3.4 returns the following message:

**writing to routing socket: No such process
delete net default: gateway 1.2.3.4: not in table**

What does the message indicate?

- A. The default gateway address is not 1.2.3.4.
- B. The default is in the permanent cache.
- C. You do not have permission to delete the route.
- D. The route daemon is not running.

Answer: A

QUESTION NO: 9 What is an SNMP trap?

- A. an event sent to UDP port 162
- B. a message generated by the NMS
- C. an unsolicited event notifying the NMS of a change
- D. an application that sits and listens for incoming information

Answer: C

QUESTION NO: 10 How many bits are in an IPv4 address?

- A. 8
- B. 16
- C. 32
- D. 64

Answer: C

QUESTION NO: 11 Which function does the point-to-point protocol (PPP) perform?

- A. checking point-to-point connections on a LAN
- B. transmitting datagrams over serial point-to-point links
- C. updating point-to-point routing tables
- D. changing the routes that systems take between two points

Answer: B

QUESTION NO: 12 What is the name of the collection of networks and gateways (including ARPANET, MILNET, and NSFnet) that use the TCP/IP protocol suite and function as a single, cooperative virtual network?

- A. Intranet
- B. Internet
- C. World Wide Web
- D. NIC

Answer: B

QUESTION NO: 13 A campus network has a subnet of 255.255.255.224. Which hosts are in the same subnet?

Host A 10.1.20.33/27
Host B 10.1.20.31/27
Host C 10.1.20.1/27
Host D 10.1.20.49/27

- A. None
- B. B and C
- C. A, B, and C
- D. A, B, C, and D

Answer: B

QUESTION NO: 14 What is the IP address range for Class A networks?

- A. 0-126
- B. 0-127
- C. 1-126
- D. 1-192

Answer: C

QUESTION NO: 15 Which is TRUE about UDP?

- A. UDP is a connectionless protocol.
- B. UDP uses a three-way handshake.
- C. UDP enforces correct packet sequencing.
- D. UDP uses a sliding window for flow control.

Answer: A
