**Important Note**  
**Please Read Carefully****Study Tips**

This product will provide you questions and answers along with detailed explanations carefully compiled and written by our experts. Try to understand the concepts behind the questions instead of cramming the questions.

Go through the entire document at least twice so that you make sure that you are not missing anything.

**Latest Version**

We are constantly reviewing our products. New material is added and old material is revised. Free updates are available for 90 days after the purchase. You should check your member zone at CramBible an update 3-4 days before the scheduled exam date.

Here is the procedure to get the latest version:

1. Go to [www.CramBible.com](http://www.CramBible.com)
2. Click on Member zone/Log in
3. The latest versions of all purchased products are download from here. Just click the links.

For most updates, it is enough just to print the new questions at the end of the new version, not the whole document.

**Feedback**

Feedback on specific questions should be send to [web@CramBible.com](mailto:web@CramBible.com). You should state: Exam number and version, question number, and login ID.

Our experts will answer your mail promptly.

**THE TOTAL NUMBER OF QUESTIONS IS 69**

**QUESTION NO: 1 What is the maximum number of drive letters per cluster for shared drives with Microsoft Windows Server 2003?**

- A. 18
- B. 19
- C. 20
- D. 23

**Answer: D**

**QUESTION NO: 2 What is least likely to fail in a Windows Server 2003 network environment?**

- A. hardware
- B. applications
- C. operating system
- D. operational issues
- E. infrastructure (building, power, network)

**Answer: A**

**QUESTION NO: 3 Which tasks have been identified by HP as important when planning network capacity and the graceful failover and failback of cluster resources and services? Ensure that: \_\_\_\_\_. Select TWO.**

- A. each cluster node has processors of sufficient speed to handle the maximum client load of the entire cluster
- B. the surviving node network speed and protocol will handle the maximum number of I/Os necessary to support critical services
- C. the throughput of the NIC on the surviving node is sufficient to handle the maximum network load for peak load cluster services
- D. each individual cluster node can handle the maximum number of clients that can attach to the cluster
- E. the shared storage capacity is sufficient to handle the load of the entire cluster

**Answer: B, D**

**QUESTION NO: 4 The HP ProLiant DL380 Packaged Cluster with MSA1000 supports how many additional storage enclosures?**

- A. 0
- B. 1
- C. 2
- D. 3

**Answer: C**

**QUESTION NO: 5 Which HP PCI-to-Fibre Channel host bus adapter (HBA) uses the small form factor transceiver connection and supports the MSA1000?**

- A. 32-bit/33MHz HBA using the Tachyon chipset
- B. 64-bit/33MHz HBA using the Emulex chipset
- C. 64-bit/66MHz FCA-2101 HBA using the QLogic chipset
- D. 64-bit/66MHz HBA using the Tachyon chipset

**Answer: C**

**QUESTION NO: 6 The ProLiant DL380 Packaged Cluster with MSA500 supports how many additional storage enclosures?**

- A. 0
- B. 1
- C. 2
- D. 3

**Answer: C**

**QUESTION NO: 7 Which SQL Server clustering requirement changed between SQL 7.0 and SQL 2000?**

- A. Only licenses for the first node in the cluster were required for SQL 7.0; all nodes must have licenses for SQL 2000.
- B. Multiple virtual SQL servers could not run on the same set of disks for SQL 7.0, but can run on the same set of disks for SQL 2000.
- C. Binaries are on the shared disk for SQL 7.0, but on the local disk for SQL 2000.
- D. Microsoft Transaction Server and Microsoft Queue Manager are no longer included as components of SQL 2000.

**Answer: C**

**QUESTION NO: 8 Cluster.exe can be used to \_\_\_\_\_.**

- A. launch the Cluster Monitor utility
- B. administer clusters
- C. launch Microsoft Cluster Administrator
- D. power down the cluster

**Answer: B**

**QUESTION NO: 9 Which adjustments should be made to the network adapter that has been set to Internal Cluster Communications Only? Select THREE.**

- A. Designate the adapter as the primary NIC in a fault-tolerant team.
- B. Remove all protocols other than TCP/IP and disable the Media Sense feature.
- C. Set the adapter to a specific speed of 10Mb/s or 100Mb/s.
- D. Set the adapter to use NetBIOS.
- E. Set the adapter duplex mode to half duplex.
- F. Use the auto-detect setting on the network adapter for the private interconnect.

**Answer: B, C, E**

**QUESTION NO: 10 Which description accurately depicts an HP Multi-Server Card?**

- A. It supports up to 64 network devices within a single UPS group and provides unattended, sequential shutdown of every device in that group, regardless of the operating system.
- B. It enables each load segment to function as a separate UPS with individual shutdown schedules and load segment configurations.
- C. It detects and warns users of power failures and manages a safe system shutdown before the backup power supply is exhausted.
- D. It allows for the safe installation of new batteries through the front panel, without powering down the connected equipment.

**Answer: B**

**QUESTION NO: 11 Which component of Insight Manager 7 enables you to browse cluster and component status in a tree hierarchy?**

- A. Systems Manager
- B. Cluster Monitor
- C. Cluster Manager
- D. Management Services

**Answer: B**

**QUESTION NO: 12 When creating a clustered volume mount point on a cluster node, which requirement must be met? The partition to be mounted must be \_\_\_\_\_.**

- A. created on the Quorum disk
- B. mounted to a shared disk in a different group
- C. created on a non-clustered disk
- D. formatted using NTFS

**Answer: D**

**QUESTION NO: 13 ProLiant clusters can achieve availability levels 2 and 3 of the standard availability levels defined by the industry and adopted by HP. What is a characteristic of these availability levels?**

- A. Work stops.
- B. Performance degradation can result.
- C. Transactions must be rerun.
- D. Shutdown is uncontrolled.

**Answer: B**

**QUESTION NO: 14 What is the leading cause of downtime?**

- A. hardware failures
- B. operational activities
- C. software failures
- D. infrastructure problems

**Answer: D**
