Important Note
Please Read Carefully**Study Tips**

This product will provide you questions and answers along with carefully compiled and written by our experts. Try to understand the concepts behind the questions instead of cramming the questions.

Go through the entire document at least twice so that you make sure that you are not missing anything.

Latest Version

We are constantly reviewing our products. New material is added and old material is revised. Free updates are available for 90 days after the purchase. You should check your member zone at CramBible an update 3-4 days before the scheduled exam date.

Here is the procedure to get the latest version:

1. Go to www.CramBible.com
2. Click on Member zone/Log in
3. The latest versions of all purchased products are download from here. Just click the links.

For most updates, it is enough just to print the new questions at the end of the new version, not the whole document.

Feedback

Feedback on specific questions should be send to web@CramBible.com. You should state: Exam number and version, question number, and login ID.

Our experts will answer your mail promptly.

Answer & Explanation

Correct Answer

Explanations(Click me to Show)

Match each migration operation type with its description.

Operation Types	Descriptions
Offline Migration:	place here
Storage Migration:	place here
Live Migration:	place here

Descriptions to Select:

- The powered-up virtual machine is moved using VMware VMotion technology.
- The virtual disk is not copied to the target host. The virtual machine may need to be stopped to move it to a new SAN or NAS location.
- The virtual disk is copied to the host. The virtual machine must be stopped.

Done

Operation Types	Descriptions
Offline Migration:	The virtual disk is copied to the host. The virtual machine must be stopped.
Storage Migration:	The virtual disk is not copied to the target host. The virtual machine may need to be stopped to move it to a new SAN or NAS location.
Live Migration:	The powered-up virtual machine is moved using VMware VMotion technology.

Descriptions to Select:

- The powered-up virtual machine is moved using VMware VMotion technology.
- The virtual disk is not copied to the target host. The virtual machine may need to be stopped to move it to a new SAN or NAS location.
- The virtual disk is copied to the host. The virtual machine must be stopped.
