**Important Note**  
**Please Read Carefully****Study Tips**

This product will provide you questions and answers along with detailed explanations carefully compiled and written by our experts. Try to understand the concepts behind the questions instead of cramming the questions.

Go through the entire document at least twice so that you make sure that you are not missing anything.

**Latest Version**

We are constantly reviewing our products. New material is added and old material is revised. Free updates are available for 90 days after the purchase. You should check your member zone at CramBible an update 3-4 days before the scheduled exam date.

Here is the procedure to get the latest version:

1. Go to [www.CramBible.com](http://www.CramBible.com)
2. Click on Member zone/Log in
3. The latest versions of all purchased products are download from here. Just click the links.

For most updates, it is enough just to print the new questions at the end of the new version, not the whole document.

**Feedback**

Feedback on specific questions should be send to [web@CramBible.com](mailto:web@CramBible.com). You should state: Exam number and version, question number, and login ID.

Our experts will answer your mail promptly.

**THE TOTAL NUMBER OF QUESTIONS IS 68**

**QUESTION NO: 1 Which FCIP device supports HP B-series, but not C-series Fibre Channel switches for SAN extension?**

- A. SAN Valley SL1000 IP-SAN Gateway
- B. HP StorageWorks MPX100
- C. HP StorageWorks SR2122-2 IP Storage Router
- D. HP StorageWorks Multiprotocol Router

**Answer: D**

**QUESTION NO: 2 Which critical areas must the SAN architect be able to discuss during SAN design? (Select three.)**

- A. data protection
- B. data availability
- C. data replication
- D. SAN scalability
- E. high availability
- F. SAN availability

**Answer: A, B, D**

**QUESTION NO: 3 During an infrastructure assessment, which SAN management category ensures that data is available and accessible?**

- A. SAN fabric management
- B. SAN usage and monitoring

- C. SAN storage management
- D. SAN data management

**Answer: D**

**QUESTION NO: 4 Your customer wants to migrate from a monolithic to a modular SAN design. Which benefits does the new design provide the customer? (Select two.)**

- A. minimum complexity
- B. lowest number of SAN switch ports
- C. mainframe connectivity
- D. consistent throughput and performance
- E. very high scalability

**Answer: D, E**

**QUESTION NO: 5 Which naming schemes are used by iSCSI nodes? (Select two.)**

- A. iSCSI qualified name
- B. enterprise unique identifier
- C. SLP service number
- D. fully qualified domain name
- E. world wide network identifier

**Answer: A, B**

**QUESTION NO: 6 What is the purpose of the Data Sanitation per event service?**

- A. to clean unwanted data to recover storage capacity
- B. to minimize the risk of data corruption involved in data transfer
- C. to safeguard customer confidential business information
- D. to remove viruses and recover lost data

**Answer: C**

**QUESTION NO: 7 What maps different protocol devices to iSCSI targets?**

- A. iSCSI initiator
- B. iSCSI bridge
- C. another iSCSI target
- D. Ethernet bridge

**Answer: B**

**QUESTION NO: 8 What are the primary responsibilities of the SAN architect?**

**(Select three.)**

- A. ensuring data availability
- B. solving revision conflicts
- C. solving management problems
- D. ensuring data protection
- E. solving SAN scalability issues
- F. ensuring database consistency or validity

Answer: A, D, E

**QUESTION NO: 9** Click the Exhibit button.

You are presenting your SAN migration plan to a customer who is confused about the different availability levels of a SAN fabric. Which level of availability is shown in the exhibit?

- A. Level 1
- B. Level 2
- C. Level 3
- D. Level 4

Answer: C

**QUESTION NO: 10** Which task must be performed before merging two compatible Fibre Channel switch fabrics?
