Important Note
Please Read Carefully**Study Tips**

This product will provide you questions and answers along with carefully compiled and written by our experts. Try to understand the concepts behind the questions instead of cramming the questions.

Go through the entire document at least twice so that you make sure that you are not missing anything.

Latest Version

We are constantly reviewing our products. New material is added and old material is revised. Free updates are available for 90 days after the purchase. You should check your member zone at CramBible an update 3-4 days before the scheduled exam date.

Here is the procedure to get the latest version:

1. Go to www.CramBible.com
2. Click on Member zone/Log in
3. The latest versions of all purchased products are download from here. Just click the links.

For most updates, it is enough just to print the new questions at the end of the new version, not the whole document.

Feedback

Feedback on specific questions should be send to web@CramBible.com. You should state: Exam number and version, question number, and login ID.

Our experts will answer your mail promptly.

THE TOTAL NUMBER OF QUESTIONS IS 125**QUESTION NO: 1**

A customer is adding an EVA4400 to their environment which includes an HP BladeSystem and a Virtual Library System. Which remote monitoring solution is appropriate?

- A. HP Insight Remote Support
- B. HP StorageWorks CommandView EVA
- C. HP Systems Insight Manager
- D. HP Systems Insight Manager with Remote Support Pack

Answer: D

QUESTION NO: 2

A customer requires you to set a password for each HP EVA you are managing through server based management. After setting the password through the OCP, what must be done to get access through HP CommandView EVA to those arrays?

- A. Set the same password through the OCP on each array.
- B. Set the same password as set through the OCP in HP CommandView EVA.
- C. Set the same password through the OCP on each array and in HP CommandView EVA.
- D. Set the same password through SSSU on each array.

Answer: B

QUESTION NO: 3

A customer wants to deploy tiered storage. Which EVA feature meets this requirement?

- A. automatic resizing of LUNs
- B. capability to front-end existing storage

- C. Fibre Channel, FATA and SSD drives that can coexist in a single array
- D. data-in-place upgrades from existing EVAs

Answer: C

QUESTION NO: 4

A customer wants to integrate VMware Infrastructure 3 with HP EVA storage replication to allow pre-programmed disaster response. What must be implemented to meet this requirement?

- A. Cluster Extension EVA
- B. Dynamic Capacity Management
- C. Site Recovery Manager
- D. HP Storage Essentials SRM Enterprise Edition

Answer: C

QUESTION NO: 5

A customer wants to purchase a new Business Copy license for their EVA. On what is the snapshot license ?

- A. Usable capacity of the storage in the EVA
- B. Usable capacity of the virtual disks replicated
- C. number of planned snapshots
- D. Usable capacity of the planned snapshots/snapclones

Answer: B

QUESTION NO: 6

A customer with an existing SAN and storage array has decided to invest in new hardware. You

determine that hp Storage?

StorageWorks Business Copy EVA are required to meet their business needs. Which HP services should you propose to ? integration and stable operation? (Select three.)

- A. Power installation
- B. Storage Setup Solution Service
- C. SAN Gold Care - Technology Refresh
- D. SAN Solution Service
- E. Data Replication Solution Service
- F. Data Migration

Answer: DEF

QUESTION NO: 7

A disk group is set to double protection level and contains only Vraid1 virtual disks. What happens when there is simultaneous loss of two physical disks from different mirrored pairs within the same Redundant Storage Set?

- A. The Vraid1 fails and there is data loss.
- B. Vraid1 data migrate to Vraid5.
- C. The Vraid1 virtual disk stays in degraded mode and data is preserved.
- D. The Vraid1 data from the failed disks is reconstructed.

Answer: D

QUESTION NO: 8

A mirrorclone is in normalized/synchronized state. What must be done to present it to a host?

- A. The disk must be fractured, then replicated with a snapshot.
- B. The disk must be fractured.
- C. The disk must be fractured, then detached.
- D. The disk must be fractured, then replicated with a snapclone.

Answer: B

QUESTION NO: 9

A Vraid5 virtual disk in an HP storageworks EVA/4400 has two disk drives that reside in different Redundand St??? the Failed State simultaneously. What happenes?(select two)

- A. Data residing on the remaining disk drives is releveled
- B. Tne two railed drives go into the migrating state to preserve the data
- C. The virtual disk fails and there is data loss
- D. The virtual disk stays in degraded mode and the data is preserved
- E. Tne data from the failed disk drives is reconstructed

Answer: AE

QUESTION NO: 10

After installing EVAPerf, which tools can display EVA performance metrics? (Select two.)

- A. HP Scanmaster
- B. HP EVAPerf Graphical User Interface
- C. Windows Perfmon
- D. EVA DT
- E. HP EVAPerf Command Line Interface

Answer: CE

QUESTION NO: 11

An EVA component failed and you verified that you are authorized to replace it yourself. Which tools should you check for hardware problems? (select two)

- A. WEBES system Event Analyzer
- B. HP Insight Remote Support
