**Important Note**  
**Please Read Carefully****Study Tips**

This product will provide you questions and answers along with carefully compiled and written by our experts. Try to understand the concepts behind the questions instead of cramming the questions.

Go through the entire document at least twice so that you make sure that you are not missing anything.

**Latest Version**

We are constantly reviewing our products. New material is added and old material is revised. Free updates are available for 90 days after the purchase. You should check your member zone at CramBible an update 3-4 days before the scheduled exam date.

Here is the procedure to get the latest version:

1. Go to [www.CramBible.com](http://www.CramBible.com)
2. Click on Member zone/Log in
3. The latest versions of all purchased products are download from here. Just click the links.

For most updates, it is enough just to print the new questions at the end of the new version, not the whole document.

**Feedback**

Feedback on specific questions should be send to [web@CramBible.com](mailto:web@CramBible.com). You should state: Exam number and version, question number, and login ID.

Our experts will answer your mail promptly.

- A. NSF file
- B. WSDL file
- C. Web service
- D. Action button

**Answer: B**

**QUESTION NO: 3**

Judi is creating a Notes composite application. Her main view has a column called Nationality, and it is a property of her composite application. Where will she find the property attribute for that column?

- A. In the Shared Code area, under WSDL files
- B. In the Shared Resources area, under WSDL file
- C. In the Composite Applications area, under Applications
- D. In the View Column properties box, final tab under the Composite Settings area

**Answer: D**

**QUESTION NO: 4**

Erin has been asked to add a new component, called "Tag Cloud", to his composite application. The component is being provided via components.nsf (based on the updatesite.ntf template).

How should Erin proceed in adding this component to his application?

- A. Right-click the Component Palette in the Composite Application Editor. Select Add Components > Add NSF Component.
- B. Right-click the Component Palette in the Composite Application Editor. Select Add Components > Add Components from Update Site.
- C. Open the Plug-ins view in components.nsf in the Notes client. Select Tag Cloud Plug-in, and click the Import Database view action button.
- D. Open the Components view in components.nsf in the Notes client. Select the Tag Cloud component, and click the Import Database view action button.

**Answer: B**

#### QUESTION NO: 5

If you export Wiring properties from a Notes database in Domino designer, what gets exported to a file?

- A. A WSDL file describing the Wiring properties
- B. A file in proprietary Notes rich text format
- C. A DXL file representing the Wiring Properties
- D. A binary file that can only be used for import to another Notes database

**Answer: A**

#### QUESTION NO: 6

Paul has added an NSF View component to his composite application, but when it displays it shows both the View and the list of folders and views in the database to the left of the View. How can he display just the view?

- A. Add "&HideNavigator" to the end of the Notes URL in the View's NSF Component Properties.
- B. Select the Hide Navigator box in the Advanced tab of the View Properties in Domino Designer.
- C. Add an Advanced Property to the View's NSF component called "com.ibm.notes.view.hideNavigator" and set its value to "true".
- D. Right-click the View Component in the Composite Application Editor and select the Hide Navigator option in the drop-down menu.

---

**Answer: A**

**QUESTION NO: 7**

Francie has developed a Component Palette in one of her composite applications that will be a good match for a new composite application that she is developing. How can she reuse that palette?

- A. Use theDXLExporter and DXLImporter functions to move the component palette between applications.
- B. Copy and paste the palette elements from the original composite application to the new composite application.
- C. Select the original composite application palette from within the new Composite Application Editor's Copy From menu option.
- D. Export the existing Component Palette from the original application, and then import the Component Palette into the new application.

**Answer: D**

**QUESTION NO: 8**

Jacques is creating a composite application to integrate multiple components. He has his newly-created application open in the Composite Application Editor, and sees two of the components that he needs listed in the right pane. What does Jacques need to do to incorporate these components into his composite application?

- A. Double-click each desired component.
- B. Nothing. The listed components are automatically part of the application.
- C. Right-click each desired component and select Wire to Composite Application.
- D. Drag each desired component from the Component Palette onto the application page.

**Answer: D**

**QUESTION NO: 9**

- A. Composite Applications > Files
- B. Composite Applications > Applications
- C. Composite Applications > Web Services
- D. Composite Applications > Wiring Properties

**Answer: D**

**QUESTION NO: 11**

Which of the following built-in wiring data types should be used for defining Properties to ensure maximum compatibility between components?

- A. http:url
- B. xsd:string
- C. cai:variant
- D. notes:string

**Answer: B**

**QUESTION NO: 12**

Theodor created new Wiring properties for his composite application, CustOrder.nsf, using Domino Designer. He named the Wiring properties "CustOrder", and has just finished defining the Wiring properties using the Property Broker Editor. What should Theodor do next to store the updated Wiring properties in the design of CustOrder.nsf?

- A. Close the Property Broker Editor window. As with other elements of a Domino database, the compiled code is automatically stored within the NSF.
- B. Select File > Save, and select File > Exit from the Property Broker Editor. With theCustOrder Wiring properties still highlighted in Domino Designer, select File > Save.
